Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 5 and 13-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Burch in view of Ordendorff et al.

Burch shows a container 10, frame portions 11, 12 having apertures 11b, area within 39, and locking means 39. Burch lacks dispensing means. Ordendorff et al show dispensing means 44 to drain the liquid out of the container. It would have been obvious to one of ordinary skill in the art to have modified the Burch container with a dispenser as taught by Ordendorff et al to drain the liquid from the container.

Re claims 15-18 the Burch/Ordendorff et al apparatus discloses the claimed invention except for specific shape of the frame portions. It would have been an obvious matter of design choice to modify the Burch/Ordendorff et al frame portions in the shape rectangular, circular, triangular and irregular and the apertures the same shape as the frame portion or a different shape from the frame portions, since such a modification would have involved a mere change in the shape of a component. A change in shape is generally recognized as being within the level of ordinary skill in the art.

Allowable Subject Matter

Claims 21-22 are allowed.

Claims 2-4 and 6-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Response to Arguments

Applicant's arguments filed 8/26/05 have been fully considered but they are not persuasive. Applicant alleges that Ordendorff does not teach a dispenser. Ordenhoff clearly teaches a drain plug 44 to drain/dispense a liquid from a container.
